It’s like having an extra set of hands... or eight.

Give more teachers the tools they need with an interactive display that’s easy to deploy, simple to manage, and ready to grow with your district. Start with the best of SMART’s innovations and add advanced capabilities only where they’re needed.

Setting the standard for interactive classrooms

Simplify procurement, deployment, and management with a 55”–98” lineup so you can standardize on a familiar SMART experience across the widest range of spaces.

The best inking experience

Write over anything on your screen, and your notes stay exactly where you put them, even as you switch between apps. Write and navigate on Chrome and apps at the same time, without ever freezing your screen.

Lasts longer. Demands less.

The MX-V6 can support Android versions up to and including Android 19*, helping keep devices current for longer. With upgradeable technology, centralized management, and value beyond instruction – from alerts and communications to captions and translations – SMART displays make life easier for your team and help schools get more from every investment.

*Subject to chipset vendor support, Google platform and certification requirements, and successful validation by SMART. Availability, timing, and scope of support are subject to change

SMART iQ 4 OS

Personalized OS for intuitive teaching and IT management

A system designed for security and simplicity with personalized, portable sign-ins and centralized remote management. The most robust, flexible, and accessible OS to date.

Built for IT. Ready for anything

iQ4 combines enterprise-level admin controls and powerful remote management capabilities that scale across your fleet. Ensure data protection, regulatory compliance and manage and troubleshoot devices centrally without breaking a sweat.

Private. Portable. Protected.

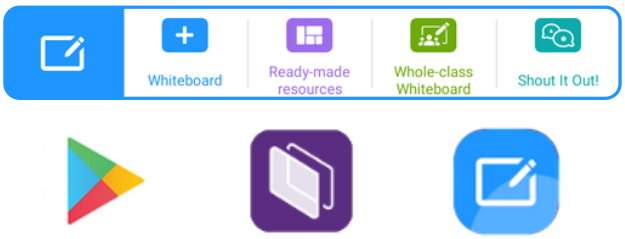

Teachers securely access their profile and cloud files on any SMART display with their **Google or Microsoft credentials** thanks to SMART Account roaming profiles.

- **Your policies, your sign-in.** Flexibly sign in without adding new passwords to manage or compromising security
- **Restrict sign-in to accounts on your domain** for enhanced security
- Lock down guest access

Walk up and teach

The OS that works with what you know.
EDLA-licensed iQ 4 fits right into your district's ecosystem—no retraining required. iQ 4 works great with:

- Google Workspace for Education
- Microsoft Office 365
- Android apps, with full access to Google Play
- Video conferencing platforms

Less training, more teaching.
Built-in apps are so intuitive that even day-one teachers can jump right in to supercharge engagement and maximize student devices.
