

SMART[®] SoundFlow

 **AURACAST**
A BLUETOOTH TECHNOLOGY

Classroom direct-to-device audio broadcasting system that ensures equal access to instruction. Audio is discreetly transmitted to Auracast™-compatible personal listening devices, without complex infrastructure.

Clear audio access for every learner

Instruction reaches every student, regardless of seat or hearing needs.

- ✓ Direct streaming to Auracast™ hearing aids, headphones, and speakers
- ✓ Supports inclusive listening without added complexity
- ✓ Reduces impact of distance and background noise

Uninterrupted lessons for every teacher

Focus stays on teaching while audio runs seamlessly.

- ✓ Clear, consistent sound across the classroom with 30m wireless range
- ✓ Simple controls via SMART's iQ4 operating system (start, stop, secure access)
- ✓ Deliver classroom instructions and lesson audio simultaneously (*SMART SoundLift mic required to capture teacher audio*)

Accessible audio for every classroom

Inclusive audio using the technology already in your classroom.

- ✓ Works on SMART Boards with iQ4 (MX-V5, RX-V1, and newer series)
- ✓ Auracast™ compatible for unlimited direct-to-device listening
- ✓ Plug-and-play setup with no additional infrastructure
