

SMART Signage Solutions

Centralized communications delivered on one platform

SMART displays have long been trusted across classrooms and workplaces for ease of workflow, management, and adoption. Extend the same capability into full-scale communications with the SMART DSN series and SMART Control signage software, bringing purpose-built digital signage, instant announcements, and CAP alert notifications to every space in your institution.

One platform, one vendor for every message, on every screen.

SMART DSN series

The DSN series is the signage and companion display built for institutional environments. The DSN series is your one display for digital signage, ad-hoc announcements, and emergency alert notifications.

- ✓ Managed from the same platform as all new SMART Boards with iQ4
- ✓ Supports landscape or portrait orientation
- ✓ Compatible with AV, BMS, and third-party CMS platforms

SMART Control Signage

Digital signage software that turns your SMART displays into centrally managed communication hubs, without complex setups or installations.

- ✓ Manage all communications from one platform
- ✓ Intuitive UI for all users, including non-IT
- ✓ Manage all compatible SMART displays from the same platform

Reach every display

Enroll in SMART Control

Manage device and communications to SMART displays.

Alerts & messages

Integrate with CAP alert providers; and send instant messages.

Schedule signage

Upload or link content. Create playlists and schedule signage announcements.

SMART Control Signage

Digital signage software for SMART displays

SMART Control Signage is the digital signage software that transforms SMART displays into centrally managed communication endpoints. It eliminates the need for signage-dedicated hardware or setups, enabling use by communications teams, principals, and IT teams alike.

Manage signage from the same platform as emergency alerts and instant announcements.

Did you know?

Emergency alert integration is included with the purchase of new compatible SMART displays!

One platform advantage

Manage emergency alerts, instant announcements and digital signage, across schools, districts, and SMART displays, from the same platform.

Built for every role

Intuitive UI that enables communications team, principals, and IT admins to use the tool alike. No extra media players, setup, installation, or hardware.

Fits existing workflows

Upload content from your existing tools like Google Slides and PDFs to create playlists and schedule and publish messages.

Maximized value

Unlock greater value from your SMART Boards by extending use beyond teaching to communication.

Compatible with:

*GX Plus and DSN compatibility effective September 2026.
SMART display availabilities vary by region.
