

Get started with your GX Plus

Use this checklist to explore all of the features of the GX Plus

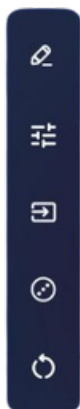

Explore the Display

- ☐ Locate the **Power** button on the front control panel.
- ☐ Use the **Volume** buttons on the front panel.
- ☐ Tap **Freeze** to pause the screen (great for discussions!).
- ☐ Tap the **Home** on the front control panel to quickly return to the homescreen.

Side Toolbar

- ☐ Tap the **Side Toolbar** buttons on either side of the screen to open the toolbar.
- ☐ Tap the **Widgets** menu to view all of the available widgets
- ☐ Tap the **Clean Up** feature to log out of all browser sessions, & close apps.

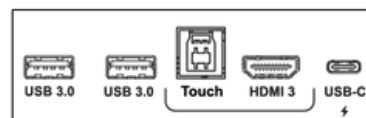

Tip: Tap the screen if the side toolbar buttons aren't displayed.

Connect your computer

- ☐ Connect a computer to your display using both an **HDMI cable** and, to enable touch, a **USB cable**.

Or use a single **USB-C cable** for both video and touch.

- ☐ Press the **Input** icon  on the home screen, then tap the computer's input menu option.
- ☐ **Interact** with any computer file on your SMART interactive display using **SMART Notebook** or **SMART Ink**.

Get started with your GX Plus

Whiteboard

Tap the Whiteboard icon on the Home screen to open a new whiteboard

- ☐ Tap the **Select tool** to move, resize, rotate, delete, or layer objects
- ☐ Click the **page numbers** to interact with all of the pages (rearrange, delete, add)
- ☐ Add new pages with the **Add Page tool**
- ☐ Use **pinch-to-zoom** (two fingers) to zoom in and out

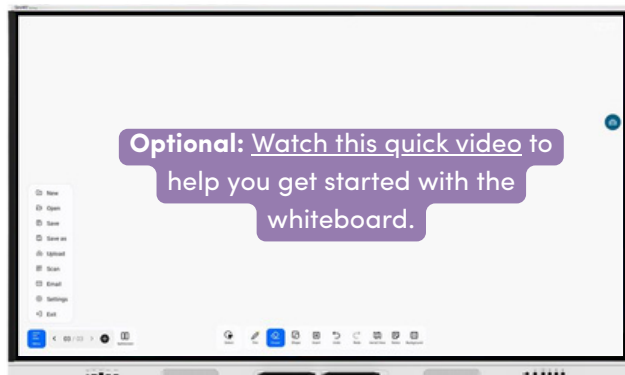

Customize the Background

- ☐ Tap the **Menu > Theme** icon
- ☐ Choose a **template** (lined, graph, etc.)
- ☐ **Set or upload** a background image
- ☐ Change the **background color**

Write, Draw & Erase

- ☐ Use the **Pen tool** to write or draw with your finger or pen.
- ☐ Tap the pen again to **change color or style**.
- ☐ Enable **multi-finger writing** in **Settings** to write with two pens simultaneously.
- ☐ Use the **Eraser** to remove ink

Import Files & Interactive Elements

- ☐ Use **Import** to add images, PDFs, or .svg/.iwb files into the whiteboard
- ☐ Tap **More** to add a variety of elements
- ☐ Add rulers, shapes, and tables, Mind maps, and Interactive teaching visuals

Open, Save, & Share Whiteboards

- ☐ Open saved whiteboards from the display, USB, or cloud via **Menu > Open**
- ☐ Use **Save or Save As** to store your session or rename it.
- ☐ **Export** as .png or .pdf for easy sharing.
- ☐ Use the **QR Code** icon to share a static image of your whiteboard
