

SMART Control Signage

Digital signage software for SMART displays

SMART Control Signage is the digital signage software that transforms SMART displays into centrally managed communication endpoints. It eliminates the need for signage-dedicated hardware or setups, enabling use by communications teams, principals, and IT teams alike.

Manage signage from the same platform as emergency alerts and instant announcements.

Did you know?

Emergency alert integration is included with the purchase of new compatible SMART displays!

One platform advantage

Manage emergency alerts, instant announcements and digital signage, across schools, organisations and SMART displays, from the same platform.

Built for every role

Intuitive UI that enables communications team, principals, and IT admins to use the tool alike. No extra media players, setup, installation, or hardware.

Fits existing workflows

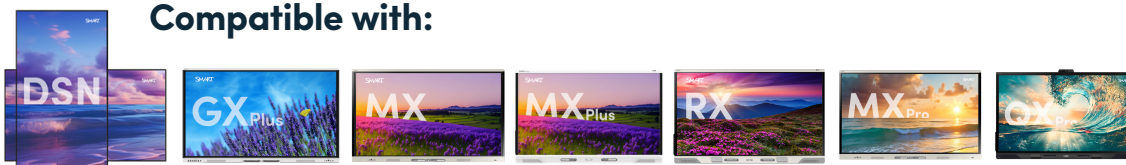

Upload content from your existing tools like Google Slides and PDFs to create playlists and schedule and publish messages.

Maximised value

Unlock greater value from your SMART Boards by extending use beyond teaching to communication.

Compatible with:

*GX Plus and DSN compatibility effective from September 2026.
SMART display availabilities vary by region.
