

Teach from anywhere in the room with Lumio

Run your Lumio lesson on your SMART Board® and control it from a second device so you can move freely and stay connected with your students.

Why use untethered multi-device delivery?

Stay mobile. Control your Lumio lesson from anywhere in the room.

Engage more deeply. Move closer to students while still managing lesson pacing.

Stay in sync. Changes made on one device appear instantly on the other.

How to use untethered multi-device delivery

1 Start your lesson on your SMART Board® Interactive Display

Open and sign into the **Lumio app** on your SMART Board

Tap a lesson tile to start a new session in live delivery

-OR-

Tap "Start live" on a previous session in the Class Sessions tab

2 Connect your second device

Open Lumio on your second device (phone, tablet, or computer)

 A session is running live in Lumio. [Open session](#)

Click "Open session" on the banner at the top of the screen

3 Now you can...

Turn pages, add annotations, launch activities, and more...

...from your second device, with all changes syncing on your SMART Board in real time

Don't have a SMART Board?

No problem! Multi-device delivery works on any two devices when using Lumio in a browser.

Multi-device delivery with the iQ Whiteboard app

- ✓ Start a whiteboard in the iQ app
- ✓ Open Lumio on your second device
- ✓ Click "Open file" on the banner at the top of the screen

 A file is running live on a SMART Board. [Open file](#)

*Note: This method will not create a new session to save student data
