

Reliable 4K UHD commercial displays with embedded Android 13 and 16/7 operation. The SMART NX series brings clarity, durability, and flexibility to a wide range of professional settings, from digital signage in lobbies and hallways, to extending presentations in meeting rooms, as well as engaging learners in the classroom. All backed by SMART's trusted reliability.

4K

Bright visuals and clear audio

Enjoy 4K UHD clarity, 400 nits of brightness, and 40W of integrated sound. Presentations, messages, and videos are clearly received, especially in large or bright spaces.

Sustainably designed

Energy Star® certified and Ecodesign compliant to lower your organization's carbon footprint. The NX is 80% more efficient than other competing 75" Energy Star certified displays.

Share from any device

Connect your way with a single cable, wirelessly over Wi-Fi, browser-based casting, or casting apps, making collaboration effortless across platforms.

Optional OPS computing

Add an OPS module to seamlessly bring a Windows experience, without messy cables or external devices.*

Built to last

The NX series goes through accelerated life testing for extreme temperatures, humidity, voltages, and vibrations, all to ensure reliable 16/7 performance. Heat tempered glass adds an extra layer of durability.

Standardize simply

SMART Remote Management makes it easy for your team to remotely manage your entire SMART ecosystem of displays.*

Elevate virtual meetings

Combine the NX series with any SMART interactive display to create the ultimate dual-screen setup for Microsoft Teams® meetings.

Simple setup

The NX comes ready to use with an included remote control, flexible input ports, and a USB-C cable for quick and reliable installation.
